

TER HELL PLASTIC GMBH

# Distribution . . .

... we're really big, even in small quantities!

**TEREZ**<sup>®</sup>

## Distribution...

...or the art of delivering plastics, in any desired quantity and any colour and property imaginable, to processors as quickly as possible.

It may sound easy but is truly an art – an art only few have mastered.

We at TER HELL PLASTIC have met all prerequisites for mastering that art. And that allows us to meet even the most challenging customer requests with precision and speed.

That applies especially to customers who request delivery of medium to small quantities.

As contract distributor for large plastics manufacturers we make certain that the requirements of customers who buy smaller quantities are met as well.

Our sales offices all across Europe are in charge of that.

From these sales offices, we provide our customers with a complete programme of thermoplastics such as PE, PP, PS, ABS, SAN, POLYAMIDE, POLYACETAL, PBT or PC as well as thermosets such as phenolic resins, unsaturated polyester resins or epoxy resins. In addition,

we offer our own line of products – including special blends, compounds, etc. Our key focus is on ABS, POLYAMIDE and POLYCARBONATE, as well as blends.

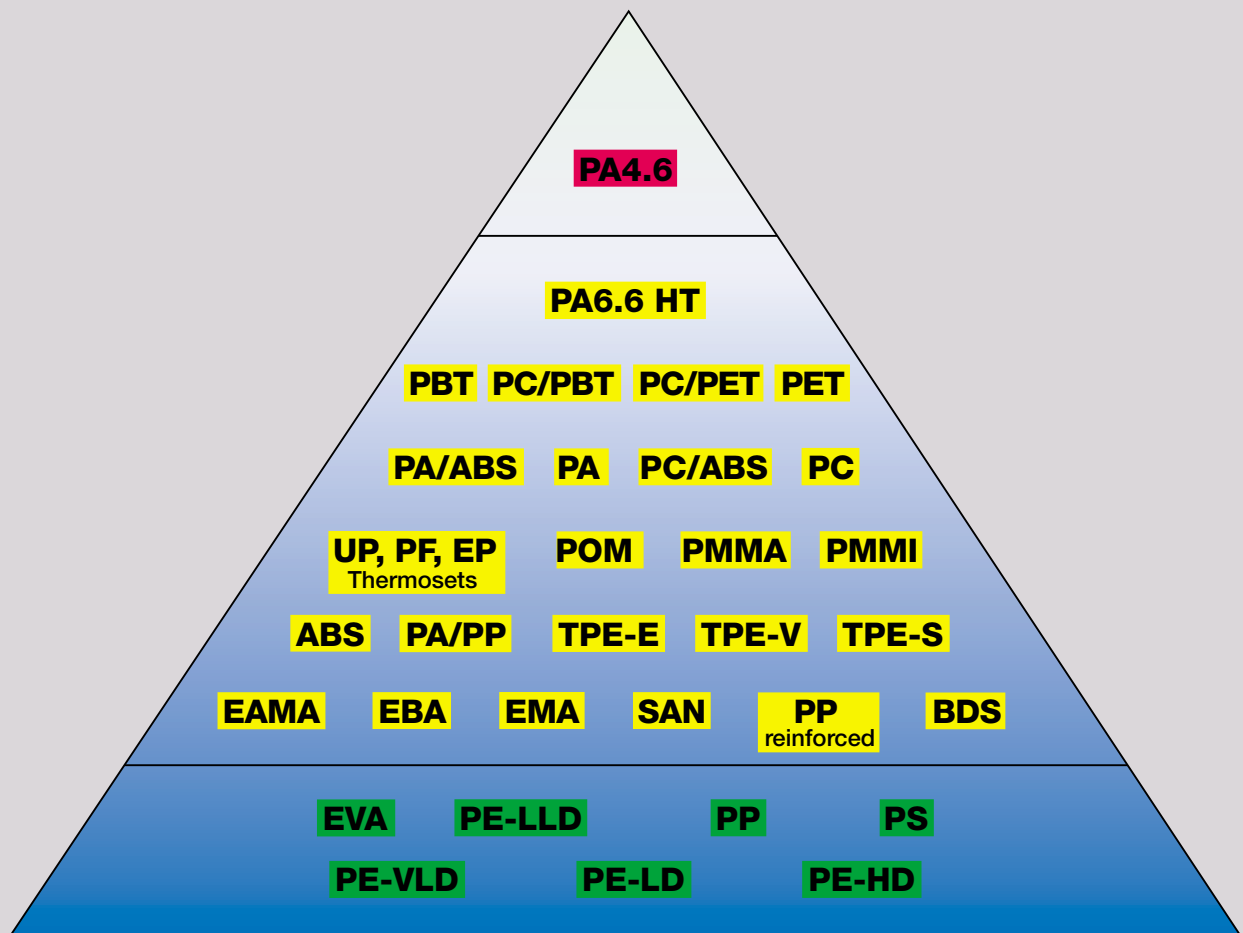

Our **Field Service** staff has the necessary qualifications and training to understand our customers' challenges and to offer solutions.

To support your needs we run our own **Applications Technology Department**, which always stays at the leading edge of developments, thanks in great part to our partnership with the large plastics manufacturers. At the same time our high-tech testing laboratory ensures that customer requirements are met optimally and that consistent quality is guaranteed.

*Products developed through cooperative efforts between customers and our application technology department.*

## Plastic Materials Portfolio

 = High Performance Plastics

 = Engineering Plastics

 = Commodities

All grades are available as pellets or in powder form (1.200 my, 800 my, 500 my, 300 my).
